Sustainable business development: Outlook

Gross profit +8.9% p.a. / EBIT +21% p.a. – what's the trick?

- Very simple method: Opex increase 2014-2024 just +6.2% p.a.
- Opex development in the M+M Group is controlled continuously & locally (~100 profit centers) at ~2/3 relative to gross profit development
 - Continuous profit gains through strict cost control management
- ✓ Working well even despite short-term dips in gross profit development (2016/17: Gross profit +3.7% / EBIT +22% // 2YR 19/21: Gross profit +8.2% / EBIT +28%)

Sustainably profitable strategy - also for the future:

- Organic growth + cost discipline = economy of scale effect

Long-term growth target (organic):

- Profit doubling in 4-5 years: EPS >360 Cents by 2028/29

Targets 2025P/26E: Continuation of sustainable development

- ◆ 2025P: Solid 9M results / Q4 profit shift to very weak PY expected
Gross profit +5-7% / EBIT/EPS +9-19% Dividend +20-30 Cents
- ◆ 2026E: Return to more dynamic growth estimated
Gross profit +8-12% / EBIT/EPS +13-25% / Dividend +25-40 Cents

Sustainability: Economy & Ecology in harmony

The M+M group is using all suitable roof surfaces in corporate ownership for regenerative power production with a total amount of ~200 MWh solar power p.a.

The M+M business model is based on resource savings for customers ...

- ✓ A precision tool tool machining two to five times faster consumes correspondingly less electricity
- ✓ The same applies when customers accelerate their technical processes by eXs, custom, PDM Booster and CIM Ready training
- ✓ Or when BIM Ready training and the use of BIM Booster enable more effective planning and resource-saving construction
- ✓ Or when large infrastructure operators can achieve their ambitious sustainability goals more quickly through MapEdit
- ✓ A structure planned and calculated with SOFiSTiK software uses less steel and concrete or can alternatively be made of a more environmentally friendly material such as wood
- ✓ With the Gardening/Landscaping design software from DATAflor, gardens or parks are created that make a direct contribution to CO₂ reduction

... which should be enough to more than compensate the M+M CO₂ footprint
